

INTERNSHIP OFFER LETTER

To ,
Naveenkumar G

Date :
February 09, 2026

We are pleased to inform you that your application for the Data Scientist Intern position has been reviewed and accepted by our Recruitment Team. We are glad to extend this official internship offer under the terms discussed.

This communication is in reference to your application submitted on February 01, 2026. Your profile was evaluated against multiple selection criteria, and our team found your academic background, technical skills, and analytical approach aligned with the operational standards and ongoing project requirements at Evoastra. You have been shortlisted among the top candidates for this role.

As a Data Scientist Intern, you will actively participate in data-driven projects and business use cases involving data cleaning, data modeling, algorithm development, predictive analysis, performance optimization, and insight generation to support business decisions. Your responsibilities will include working with structured datasets, designing predictive models, validating algorithm accuracy, identifying trends and anomalies, and supporting project teams with data-backed insights. Performance evaluation will be based on technical output, consistency, professionalism, communication, and adherence to project milestones. While project leads and reporting managers will provide guidance, a proactive and self-driven working approach is expected.

The internship tenure is valid from February 15, 2026 to March 15, 2026. Failure to join and commence assigned responsibilities within this period will result in automatic withdrawal of this offer without further notice.

We advise you to prepare accordingly and remain fully available throughout the internship duration. Any delays, prolonged inactivity, or non-compliance with assigned work may lead to early termination of the internship.

For any questions or clarifications prior to the commencement date, you may reach out to our HR team. Detailed onboarding instructions, project allocation, and reporting structure will be shared shortly.

We look forward to your contributions and a productive engagement with Evoastra.

Best regards,

Syeda Mariya Quadri
Director, Evoastra Ventures Inc.
